

19.9.14

Thank you too you all for completing the children's monster home-work. They have loved discussing their monsters with each other. They made mud pies for their monsters outside. We were using subtraction and addition problem skills to solve number problems. For example, we only had 4 stools for 4 monsters, how many monsters need stools? Do you have enough bowls for the monsters? How many more do we need? Etc. This experience enabled the children to use their negotiation skills through communication too. 😊

### **HOMEWORK**

**READING:** Please share the library books with your child at home. Please write in their reading book when you share their reading book with them. Each child will get an award for parents/ family comments in their reading books.

**WORD AND NUMBER FOLDERS:** Please share these cards every night with your child to ensure they are remembering all the sounds and numbers we share at school.

PLEASE RETURN FOLDERS EVERY FRIDAY.

Thank you for your support. Have a great weekend.

From Miss Mattison and the Early Years Team 😊
